The Future, and Nanotechnology

Nanotechnology will completely restructure industries and economies, recognized as technology disruptive to every field. Entire business segments will disappear while new, exciting segments will be created.

Hear the latest on this explosive field from the experts who know, each Sunday on The Promise of Tomorrow Radio Show.

Express your opinions about Emerging and Nano Technologies on our Voice of Reason segment, phone (214)329-4949 and record your message. Each week comments will be selected for airing on a future program. Please identify who you are and where you are from.

The Promise of Tomorrow Radio Show Sundays 7pm to 8pm,

ScienceNews Network 1360AM Dallas/Ft. Worth, TX

Moderator: Veteran talk-radio host, Colonel Mason

You can reach Colonel Mason at (214)329-4949, or colonel@prfirm1.com

Each week comments left @ (214)329-4949 will be selected for airing on future programs.

nanotxUSA Conference and Expo

"To increase international awareness of nanotechnology on both sides of the globe,

International Nanotechnology Week™ has joined with nano tech Japan as a global partner. nanotxUSA'08 exhibited at nano tech 2008 Japan in February to promote American interests at the event. nano tech Japan has gained world renown over the years as the largest nanotechnology event in the world.

tinytechjobs

Tiny tech jobs is a unique global career web site focused on jobs in nanotechnology, MEMS, microtechnology, biotechnology, and information technology. In addition to news, company information, and education and

research information, the site provides free services and resources to job seekers and effective targeted advertising opportunities for employers.
